Overview

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country of over 18 million people moves to strengthen its electricity grid. That's the promise of advanced battery energy storage systems (BESS) in Senegal. In this article, we'll explore how smart energy storage solutions are transforming West Africa's renewable energy. Imagine a world where renewable energy flows seamlessly, even when the sun sets or the wind stops. It is. Senegal's national electric utility, Senelec, has entered into a 20-year Capacity Change Agreement (CCA) with Infinity Power for the development of a substantial 40MW/160MWh Battery Energy Storage System (BESS).
