

# Seoul new energy storage power station project

## Overview

---

(KEPCO) has completed construction of a large battery energy storage project in Miryang, Gyeongsangnam-do Province. The TES is a comprehensive EV charging station that generates power using sunlight and fuel cell energy storage system (BESS). South Korea is actively involved in the integration of ESS into renewable energy. The city's electricity demand grew 18% from 2020-2024, yet its aging grid infrastructure can't handle peak loads during extreme weather events. But who's actually reading about this stuff?

Let's spill the kimchi: Why Google Loves This Content (And So Should You) When Seoul's district cooling system. The project is the first national large-scale chemical energy storage demonstration project approved by the National Energy Administration of China, with a total construction scale of 200MW/800MWh.
