

# Shopping mall uses a large-scale solar-powered modular energy storage system

**51.2V 300AH**

## Overview

---

Ala Moana Center, Hawaii's largest shopping mall, installed a 2.8 MW solar system on the previously unused rooftop and parking canopy structures that cover over 4,500 spaces. The solar panel system has over 13,000 solar panels and generates almost 5 gigawatts of electrical power. Shopping malls need a large number of solar panels—often thousands—to capture enough sunlight for their high energy demands. I design panel arrays on rooftops or nearby land to maximize sun exposure, considering orientation and shading. The solar. Shopping malls and similar venues present attractive, big-time opportunities as potential sites for grid-connected solar power, energy storage and intelligent, highly energy-efficient facilities management. Solar technology integration shopping mall buildings play a crucial role in. At Orius Solar, we offer customized solar energy solutions for shopping malls, helping to reduce operating costs and meet sustainability goals. Accordingly, the use of solar power plants is economically.
