

Single-axis photovoltaic sun tracking bracket

Overview

[270° Adjustment] The single-axis tracking mounting system allows the light sensor and controller to work together to push the pole for 270° angle adjustment, allowing the solar panel to always follow the rotation of the sun, absorbing solar energy from the southeast. [270° Adjustment] The single-axis tracking mounting system allows the light sensor and controller to work together to push the pole for 270° angle adjustment, allowing the solar panel to always follow the rotation of the sun, absorbing solar energy from the southeast. [Save floor space] Two sets of tracking brackets can hold 2-8 solar panels depending on the size. Compared with traditional tripod brackets and ground brackets, tracking brackets can save floor space, leaving the maximum space for family and garden, while also making the overall layout more. [More power generation] Single-axis tracking mounts maximize efficiency by keeping your solar panels facing the sun at all times. Single-axis tracking mounts can boost the power generation of solar panels by at least 30% compared to traditional fixed solar mounts. The primary characteristic of single-axis solar trackers is their bidirectional movement and orientation. Product model:Shielden 1P Product brand:Shielden Material: carbon steel Applicable [.] Intelligent Sunshine series tracking systems all use large-section spindles and.
