

Solar Photovoltaic Panel Testing Instrument

Overview

A solar panel tester is a specialized instrument for assessing the performance and health of photovoltaic (PV) modules. These devices are essential for anyone who installs, maintains, or troubleshoots solar systems. The Flir PV Series provides cutting-edge tools designed for solar professionals, utility companies, and manufacturers to ensure optimal performance, compliance, and long-term reliability of solar panel installations. Power Point Voltage/Current, Backlit LCD Display EY1600W Solar Panel Tester, DC/AC Solar Panel Meter, Photovoltaic. Seaward have manufactured and supplied innovative PV testers to solar professionals since 2007. Our complete test kits include everything you need to safely test and commission solar PV systems, including our accurate Solar Survey 200R irradiance meter, AC/DC power clamp and all leads and adaptors.
