

Solar energy five-year warranty power generation efficiency

Overview

Many guarantees cover around 80% to 90% of energy generation estimates. Typically, these warranties ensure that your solar panels will not degrade more than a certain percentage each year, ensuring long-term. As the name indicates, with a production guarantee (PG), the solar installer guarantees the homeowner that the installed system will produce a certain amount of energy over a certain amount of time. Most solar panel warranties won't reimburse for labor costs associated with installing new equipment or shipping fees for replacement parts.
