Solar inverter 485

Inverter data gathering via modbus protocol rs 485

Hi I'm currently doing a small project of mine in my province wherein I want to gather / pull data from the endpoint (inverter) going to cellular gateway via RS 485 modbus protocol.

Adaptors & Wiring , Deye/Sunsynk

The newer inverters have a combined RS485 and CAN-BUS port. If your battery is already using the port for its CAN-BUS communications, you need to split the cable to connect your RS485 connector.

RS485 Adapter for Inverters , Riello Solartech

The RS485 board allows creating a BUS to connect multiple photovoltaic inverters, enabling centralized monitoring via Datalogger.

Addressing a solar panel inverter to get the data via RS485

It will use the data from the Solax inverter via RS485 and I start the inverter monitoring in the morning using a real time clock module. The data is recorded (every 10 minutes) on a SDCard.

RS485 Communications

On the LCD-enabled devices, RS485-2 is only available on SolarEdge data loggers, as well as some StorEdge and EV Ready inverters. If the RS485-2 options are missing, the device does not support ...
