

Solar panel power in Pakistan

Overview

As of 2025, solar power is the largest electricity source in Pakistan, accounting for more than 25% of total production in 2025. In 2024, solar power installations in the country grew at the highest rate in the world, with solar installations providing an estimated one-third of the country's entire generating capacity added during the year. As electricity prices doubled from 2021 to 2024, and Chinese solar panel manufacturers with manufacturing overcapacity cut prices, Pakistanis have taken to installing solar pa.
