Overview

East Timor to build its first 72 MW solar plant with 36 MW storage in 2026, reducing diesel reliance and advancing clean, affordable energy access. East Timor, officially known as Timor-Leste, is poised to make a significant leap in renewable energy with confirmed plans to construct a 200 MW solar power plant. The 72 MW project in Manatuto, developed jointly by Japan's Itochu Corp and France's EDF, will also feature a 36 MW battery energy storage system to ensure stable and. Japan's Itochu Corp and Electricite de France (EDF) will jointly develop a 72-megawatt solar power plant and a 36-MW battery energy storage system in Manatuto. East Timor plans to retire its diesel power plants in the "near-to-medium term". Discover industry trends, economic benefits, and actionable insights for investors and policymakers. In addition, most of Timor-Leste's electricity is generated through. DILI, Timor-Leste - Novem—At the Timor-Leste Mining and Petroleum Summit in Dili, President José Ramos-Horta delivered a strong dual message: the nation remains unwaveringly committed to developing its hydrocarbon resources, particularly the Greater Sunrise gas field, while.
