

# Solar panels What other solar panels are there

## Overview

---

The six main types of solar panels are polycrystalline, monocrystalline, thin-film, transparent, solar tiles, and perovskite. All of these are photovoltaic panels - meaning they use daylight to generate electricity - and they're all categorised based on their material. Department of Energy-endorsed online resource that allows consumers to comparison shop for solar energy, there are three main types of solar panels available for residential use. When deciding, consider factors like your budget, roof size, sun exposure, and energy efficiency goals. This DC is then converted into alternating current (AC) by an inverter, making it usable for homes.

How to Decide What Type of Solar Panels to Get  
Monocrystalline Solar Panels  
Polycrystalline Solar Panels  
Thin-Film Solar Panels  
Passivated Emitter and

Read Cell PanelsSolar Panel Types by EfficiencySolar Panel Types by CostSolar Panel Type by Power OutputSolar Panel Type by AppearanceOther Factors to Consider When Comparing Panel TypesMonocrystalline solar panels are the front runner as the most efficient panels with 20% and up. Polycrystalline solar panels are a close competitor with 15% - 17% efficiency. While CIGS thin-film has 13% - 15% efficiency, CdTe thin-film has 9% - 11% efficiency, and a-Si thin-film has 6% - 8% efficiency. See more on forbes Author: Dawn Weinberger
