

# Solar panels are unstable when connected to the internet

## Overview

---

Short Answer: Solar panels themselves usually do not cause major Wi-Fi issues. The panels operate on direct current (DC) power and don't typically emit strong radio frequencies that would clash with your router. So when the app suddenly stops updating, loses connection, freezes, or shows offline panels, it can cause concern. But other times, it points to deeper solar system problems that affect. But after installing solar panels, you might notice slow internet, weak signals, or random disconnections. We are going to switch Internet providers asap.
