

# Solar panels can be made into tile shapes

## Overview

---

Solar tiles, also known as solar shingles or photovoltaic (PV) tiles, are a type of solar panel designed to resemble traditional roofing materials like asphalt shingles, slate, or terracotta tiles. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. They are made up of small solar cells that capture sunlight and convert it into electricity, allowing. The solar tiles They are a type of tile that integrates photovoltaic solar cells or panels, allowing electricity to be generated from sunlight.
