

Solar panels on Vienna rooftops

Overview

Vienna aims to be climate neutral by 2040, in part through adding photovoltaic systems, mostly on roofs. Soon the 572 solar panels installed on the roof of the Vienna City Hall will begin producing enough electricity to meet the needs of 110 households. It will save about 130 tons. We have set ourselves the target of doubling renewable energy production in Vienna, compared to 2005 figures, by 2030. As space and surfaces are limited resources, it is important to integrate different needs in designs for multi-purpose use. Meeting future climate and energy challenges in urban environments. This time, the company has successfully delivered a large-scale rooftop solar power project in the heart of Europe — Vienna.

Solar panels on Vienna rooftops

SolarSK completed a 1.3 MW rooftop PV plant in Vienna, Austria - SOLAR ...

The solar installation was mounted on the rooftops of logistics giant Technopark Vienna (TPV), which made a strategic move toward energy independence and optimizing electricity costs.
