

# Solar panels on the roof of container house

## Overview

---

The roof of a 40-foot shipping container offers around 28-30 m<sup>2</sup> of surface — plenty of room for a generous solar array. Here's a breakdown of a typical configuration I recommend for full autonomy in temperate climates: Solar panels: 4kWp (approximately 10-12 high-efficiency. Are you considering mounting solar panels on a shipping container and wondering what to keep in mind?

This article offers a concise overview to help you understand the key considerations and shows you some real-world examples. Can you put solar panels on a shipping container roof?
