

Solar power generation abandoned

Overview

A massive solar farm of two million panels in the Mojave Desert is heading for dormancy just 11 years after going into operation. The Ivanpah installation was once the largest project of its kind in the world, but its future is bleak. 2 billion on the Ivanpah Solar Power Facility, which is located in California's Mojave Desert, it was hoped that the state would be able. The project, the Ivanpah Solar Project, is closing next year — 13 years earlier than planned. Spanning approximately 3,500 acres along the California-Nevada border, this innovative concentrated solar power (CSP) facility aimed to harness.
