

# Solar power generation bidding price

## Overview

---

The winning bid for solar energy can vary significantly based on various factors, including location, project size, technology used, and market conditions. Recently, bids have been observed in the range of \$20 to \$60 per megawatt-hour (MWh), 3. NYSERDA's ninth annual Renewable Energy Standard (RES) request for proposals, RESRFP25-1, was issued on September 15, 2025, to advance clean energy deployments while prioritizing reliability, affordability, and a healthier future for New Yorkers. The RESRFP25-1 solicitation garnered 15 competitive bids. The Ministry of Economy, Trade and Industry (METI) will set various details related to the FIT and FIP schemes, including the surcharge rate for FY2025 and the renewable energy purchase prices for FY2025 onward. With certain regions achieving even lower figures. Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. Below is a sample search result showing the newly published government contracts and bids in renewable, solar and wind energy. These include government RFPs, RFTs, RFIs, RFQs in Renewable energy from federal. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market.
