We carefully prepare the project at a planning stage, design a solar power plant, supply a necessary equipment and materials to a construction site, carry out all construction and electrical work, connect a solar power plant to grid, put it into operation, and. Our power generation equipment and instrumentations and controls enable plant operators to make highest efficient use of every single sun beam.

Concentrated solar thermal power is worldwide becoming a more and more important source for power generation. Whether you build solar panels or operate solar farms, Rockwell Automation helps you automate faster, manage smarter, and run safer With Rockwell Automation, you enable optimized production at scale. Optimize greenfield plant design and accelerate commissioning by simulating and emulating processes.
