

Solar power generation in Ireland

Overview

Dublin, 13 November 2025 – Ireland celebrated a landmark moment in its clean energy transition, with national solar capacity surpassing 2 GW for the first time. This milestone reflects the remarkable pace of growth in Ireland's renewable energy sector. Ireland is targeting 8 GW of solar by 2030. Currently, we have nearly 8GW of renewable electricity generation capacity installed across the country, with circa 5GW of. Ireland's solar power generation has surpassed its 2024 targets, marking a monumental achievement in the nation's journey towards a sustainable energy future. This dynamic development is fueled by advancements in solar technology, significant government incentives like.
