

# Solar power generation on the roof of the community

## Overview

---

Rooftop community solar is a type of community solar project where solar panels are installed on the rooftops of buildings where participants purchase a share of the solar system and receive credits on their utility bill for the energy produced by that share. In most cases, customers benefit from energy generated by solar. As homeowners across America embrace solar energy, a crucial decision emerges: choosing between community solar projects and rooftop installations. While both options advance clean energy adoption, they serve distinctly different needs and situations. 17, 2025 | By Sara Fall and Kamyria Coney The Solar Energy Innovation Network (SEIN) Round 3 brought together eight multistakeholder. Rooftop community solar is an innovative approach to solar energy that leverages the collective power of groups to generate and share renewable energy.
