

# Solar power generation panel series

## Overview

---

Connecting solar panels in series can significantly boost your system's overall efficiency, making it easier to achieve an energy self-sufficient home. When three panels are wired in series, their voltages add together while maintaining the same current flow throughout the system. This setup increases your overall system voltage to 36-48V, ideal for charging 24V batteries or. Designing a solar panel system involves many decisions, and how you connect your solar panels is among the most critical. Understanding these configurations helps you.

- LIFePO<sub>4</sub>
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years
