

# Solar power generation projects in my country

## Overview

---

On this page, you can explore our database of planned solar projects in the US. You can then select a specific concentrating solar power (CSP) project and review a profile covering project basics, participating organizations, and power plant configuration data for the solar field, power. The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 MW) solar PV data. The utility-scale data covers all operating solar farm phases with capacities. According to a 2024 report by the World Bank, off-grid solar has the potential to bring electricity to nearly 400 million people worldwide for the first time by 2030. Carbon dioxide emissions, however, have risen to an all time high with hot weather pushing up overall demand for power. As of February 2026, there are. Visit the FEMA website for the latest information on Winter Storm Fern. Committed to Restoring America's Energy Dominance.
