

# Solar power generation while charging and using

## Overview

---

Yes, a solar generator can be used while charging. This feature is known as pass-through charging. Many wonder if they can. Solar generators are becoming essential for outdoor activities, home backup, and emergency preparedness. A common question from users is: Can you run a solar generator while it's charging?

This guide explores how it works, the benefits, and scenarios where it makes the most sense. Solar panels. These portable and eco-friendly power stations work by converting energy from the sun into electricity, which can be stored in a battery for later use.
