

Solar power generation with flashing sign

Overview

The advent of solar-powered LED flashing stop signs has completely transformed this situation. Powered by solar energy, these signs amplify the “stop and yield” warning signal several times over through dynamic LED flashing, becoming proactive guardians of road safety. TIMERS & PUSH BUTTON controls are also available. 0029 Your browser does not support the video tag. Our Flashing Pedestrian Sign helps warn drivers when pedestrians are crossing and can be activated through a button or the sign can flash 24/7. If there is a school bus stop up the hill or around the bend, use the S3-1 sign to help alert motorists. Choose from options such as "Caution Co-Generation" or "Caution Solar Circuit" in bold colors that are sure to stand out. Solar. The R247-F 24-Hour Flashing Beacon increases visibility of road signage at unsignalized intersections and work zones via its continuous flash output.
