

Solar power station in China in Melbourne

12V 10AH

Overview

A massive open-sea solar plant is under construction in China, designed to power millions of homes and test how floating solar works at scale. A Chinese company will help deliver cleaner and cheaper energy for thousands of Victorian homes, after the Allan Labor Government gave the green light to a multi-million-dollar renewable energy project in North-East Victoria. Today in Beijing, Premier Jacinta Allan met with Trina Solar – who are. China is installing record amounts of solar and wind, while scaling back once-ambitious plans for nuclear. While Australia is falling behind its renewables installation targets, China may meet its end-of-2030 target by the end of this month, according to a report. China's National Energy Administration (NEA) released its 2025 power sector statistics on Jan. Over the last few years, China, which is the top emitter of greenhouse gases (GHG), has increased its share of renewable electricity generation. It is one of several large economies that has resorted to the.
