

# Solar power tax

## Overview

---

government offers a solar tax credit that can help you recoup up to 30% of the cost of installing a solar power system. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. The residential clean energy credit also covers other types of renewable energy projects undertaken by homeowners, subject to certain guidelines. Any system installed after this year won't qualify for the discount that's helped millions of households cut thousands off their installation costs. On J, President Trump signed into law Congress's budget reconciliation bill, H. 1—commonly known as the One Big Beautiful Bill. Tax Code—expires for customer-owned residential solar systems installed after Decem.
