Overview

The inner Solar System is the region comprising the terrestrial planets and the . Composed mainly of and metals, the objects of the inner Solar System are relatively close to the Sun; the radius of this entire region is less than the distance between the orbits of Jupiter and Saturn. This region is within the, which is a little less than 5 AU from the Sun.

Solar systems include those

Solar System

The solar system comprises the Sun, all the objects gravitationally bound to it, and the heliosphere, an enormous magnetic bubble enclosing most of the known solar system, including the solar wind and ...
