

Street stalls converted to solar power generation

Overview

A powerfully simple entrepreneurial tale showing how a street vendor transformed a community with a solar charging network. Real and inspiring, this story highlights a motivating profile of Lila Chen as she grew a street stall idea into a regional solar micro-grid company. As cities, tribal nations, and developers navigate aging infrastructure, rising energy costs, and climate. In 2019, EnGoPlanet was contacted by one of the biggest global oil companies to improve street light efficiency in one of their refineries, with over 500 existing street light poles. A street stall gives members of your community the chance to meet the people involved in running a project face to face to enable energy works and its many benefits.
