

# Sunflower Solar Power Generation System

## Overview

---

The SmartFlower is a ground-mounted solar panel system designed to resemble and function like a sunflower. Its unique design—a form of biomimicry —allows it to track the sun's movement throughout the day, optimizing energy production. Charge your electric vehicle with a fast and efficient solar EV charger. Enjoy on-demand green energy for your home or business with the powerful, fully-integrated SmartFlower+ battery. This 'smart' solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop. **What Is a Solar Flower, and How Can It Help You?**

As solar energy adoption accelerates across the United States, the residential and commercial sectors are embracing renewable solutions. By the end of 2024, Americans had installed 219. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel. “Photovoltaic Sunflower” is composed of 12 petal photovoltaic leaves, with biomimetic sunflower characteristics, and adopts global positioning tracking Algorithm, ensuring 24/7 optimal power generation angle, maximizing full cycle power generation efficiency, and meeting green energy requirements.
