

# Suva energy storage market

## Overview

---

The global energy storage systems market was estimated at USD 668.7 billion in 2024 and is expected to reach USD 5.7 trillion by 2034, driven by the increasing integration of renewable energy sources, advancements in battery technology. The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger utility-scale projects. Since 2024. Utilities are substituting natural-gas peakers with six-hour systems, data-center operators are pairing flywheels with batteries to secure sub-second power quality, and EV-charging corridor developers are embedding storage to avoid costly grid-upgrades. It grows at a compound annual growth rate (CAGR) of around 14% from 2026 to 2035.
