Overview

The new solar power plant boasts a capacity of 20 MW and is set to transform Eswatini's energy landscape. With an estimated investment surpassing 400 million emalangen (roughly US. 5 million), this project promises to generate approximately 47,788 MWh in its inaugural year. Geographical Location: Eswatini is a small, landlocked country in Southern Africa, bordered by South Africa to the north, west, and south, and Mozambique to the east. Despite its size, the country features diverse topography, including mountains, savanna plains, and river valleys, which influence. Eswatini Electricity Company's internal generation is a mix of both hydro and solar PV. The company holds four major hydro power station The company currently has one solar plant, Lavumisa 10MW Solar PV Plant. It has been developed in multiple phases. This project is the first to be implemented under the 75 MW solar procurement program. In a significant stride towards energy independence, the Kingdom of Eswatini has officially launched its very first solar power plant—the Tsamela Solar Power Plant.

Swaziland solar Power Plant System

Power plant profile: Lavumisa Solar PV Park, Eswatini

Lavumisa Solar PV Park is a ground-mounted solar project which is spread over an area of 35 hectares. The project supplies enough clean energy to power 5,000 households.
