

The core mission of the Microgrid Laboratory

Overview

A collaborative effort by a range of global leaders in electricity delivery, R&D, manufacturing, standards, education, regulation, and systems integration, MSL's mission is to accelerate the transition to a more resilient, sustainable, and equitable energy system worldwide. The Microgrid Systems Laboratory (MSL) is a fully-integrated innovation center for decentralized energy systems. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov. Booth, Samuel, James Reilly, Robert Butt, Mick Wasco, and Randy Monohan. *Microgrids for Energy Resilience: A Guide to Conceptual Design and Lessons from Defense Projects*. The key elements of the Lab are: the Microgrid Education Center, operated by Santa Fe Community College, to. The lab aims at safe, reliable, efficient and secure operation of large-scale distribution networks with extremely high penetration of renewables. Local communication and automatic clustering are used to enable self-organizing microgrids. Microgrids can locally manage the.

The core mission of the Microgrid Laboratory

Microgrids for Energy Resilience: A Guide to Conceptual Design ...

The process used to perform microgrid designs at NREL is the Continuously Optimized Reliable Energy (CORE) microgrid design process. (NREL 2013) It attempts to provide the optimal ...
