

# The cost of purchasing solar panels in New Zealand

## Overview

---

On a per-watt basis, solar systems are expected to cost around \$2. For a 7 kW system (a common size for residential homes), the total cost would range from \$15,000 to. While global demand bumped prices slightly in 2022 and 2023, costs are falling again in 2025 — thanks to sharp drops in solar panel pricing. Systems of 3–5 kilowatts can work well financially for typical New Zealand households, and cost around \$8,500 to \$11,500 (incl. Each home is different and requires a tailored solution designed to your specific roof and power requirements. This guide is designed. With electricity prices jumping 8% annually and over 40,000 homes already powered by solar, Kiwis are turning to photovoltaic (PV) panels like never before. "Auckland homeowners typically break even on. The average cost of a solar power system in 2025 is projected to be between \$15,000 and \$25,000 for a typical residential installation, depending on the size, location, and quality of the system. Solar panel cost varies based on several factors, including system size and installation complexity. 2% of the cost, convert sunlight into electricity. Their quality and type affect.
