

The latest model of energy storage solar container outdoor power

Overview

The Intech Energy Container — or ECON — is a modular, pre-configured off-grid power solution. It combines solar PV, battery storage, inverters, and energy management in a rugged container. Ideal for autonomous energy supply wherever grid access is unavailable or undesired. Off-grid solar storage systems are leading this shift, delivering reliable and clean power to locations worldwide. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. A solar power container is a self-contained, portable energy generation system housed within a standardized shipping container or custom enclosure. Each container is equipped with a photovoltaic array, a battery bank, and a generator — all custom-sized to meet the specific needs of the customer.
