

The school uses a 60kW mobile energy storage container from Athens

Overview

The PFIC60K64P42 is a compact all-in-one solar storage system integrating a 60kW power output, 82kWh energy storage capacity, and 30kWp high-efficiency foldable PV. These Energy Storage Systems are a perfect fit for applications with a high energy demand and variable load profiles, as they successfully cover both low loads and peaks. For example, they can help properly size diesel generators for cranes and other electric motors, and efficiently manage peaks in. When charging and storing a mobile energy storage system, the requirements are relatively straightforward. The system should be treated as a stationary system as far as the requirements of NFPA 855 go.
