

The wind knocked down the wind turbine

Overview

A powerful tornado has swept through a wind farm in the United States, leaving a trail of crumpled power-producing towers in its wake. Five wind turbines were destroyed by the freak weather event, with one bursting into flames. This summer's sequel to the 1996 movie "Twister" brings back the familiar thrills of Midwest tornado-chasing with a new connection to the energy sector: collapsing wind turbines. Video of the direct hit on the wind farm near Greenfield, Iowa, show. A wind turbine near Carbon, Iowa was knocked down by a tornado and caught fire Tuesday afternoon. Only some of the affects from a tornado can be prevented. First responders arrived on.
