

# Three categories of new energy storage

## Three categories of new energy storage

---

### Energy Storage

Mechanical: Direct storage of potential or kinetic energy. Typically, pumped storage hydropower or compressed air energy storage (CAES) or flywheel.  
Thermal: Storage of excess energy as heat or ...

### New Energy Storage Technologies Empower Energy Transition

Depending on how energy is stored, storage technologies can be broadly divided into the following three categories: thermal, electrical and hydrogen (ammonia). The electrical category is further divided into ...

## 10 Main Types of Energy Storage Methods in 2025

Hydropower is the most frequently used mechanical energy storage method, having been in use for centuries. For almost a century, large hydroelectric dams have served as energy ...

## 10 cutting-edge innovations redefining energy storage solutions

From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience for tomorrow's grid.

As the global energy transition ...

## A review of energy storage types, applications and recent developments

Chemical energy storage systems are sometimes classified according to the energy they consume, e.g., as electrochemical energy storage when they consume electrical energy, and as ...
