

Tunisia electricity market

GRADE A BATTERY

LiFePO₄ battery will not burn when overcharged over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

Tunisia's power sector is poised for substantial expansion. 3 million in the base year of 2025 and is forecast to expand at a Compound Annual Growth Rate (CAGR) of 1. Some of these energy sources are used directly while most are transformed into fuels or. Tunisia's power sector is well developed, and nearly the entire population enjoys access to the national electricity grid. Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022. 87 gigawatt, growing from 2025 value of 7. The country has introduced policies to encourage private investment in renewables and improve energy efficiency, though progress has been. Since the 2000s, Tunisia has been facing a growing energy deficit. Natural gas currently accounts for 94. In 2023, the production cost of a kWh of electricity was 472 millimes (0. 145€), compared with a selling price set.
