

Ulaanbaatar renewable energy growth

Overview

To Ulaanbaatar, increasing third neighbour participation is paramount to the pursuit of greater diversification of energy sources. Aligning foreign investment towards the energy sector, expanding business opportunities in battery storage and installing wind and solar is. Ulaanbaatar, 28 January 2025 - UNDP Mongolia hosted a roundtable discussion under the theme “Just Energy Transition in Mongolia: Progress and Way Forward” to share key lessons from its renewable energy pilot projects and explore strategies to scale up clean energy solutions. Exposure to air. Thick, acrid smoke chokes Ulaanbaatar and its ger districts during the long winters when residents burn coal for cooking and heating. The toxic smog envelops the area for months at a time, making it one of the most polluted places on the planet and causing thousands of premature deaths each year. Image Credit: The Governor's Office of the Capital City of Mongolia (MUB) has achieved a major milestone by issuing its first over-the-counter (OTC).
