

Ultra-large capacity energy storage containers for hospitals

Overview

Compared to traditional 20-foot container systems, TENER Stack improves volume utilization by 45% and energy density by 50%, with a single-unit capacity of 9MWh. The system's large capacity also delivers substantial economic benefits. On , CATL unveiled the TENER Stack at the EES Europe trade fair in Munich, Germany, introducing the world's first mass-producible 9MWh ultra-large-capacity energy storage system, according to a company press release. The 9 MWh system supports both centralized and string power conversion system architectures, offering flexibility for a range of deployment scenarios.
