

Umbrella solar power generation

Overview

Solar umbrellas are outdoor canopies that integrate solar technology into their design. Equipped with photovoltaic cells, these umbrellas can capture solar energy and convert it into electricity, allowing users to charge devices such as smartphones and tablets while enjoying shade. Umbrella Solar is the division of Umbrella Global Energy specializing in the development, management, and operation of solar photovoltaic projects and battery energy storage systems (BESS). Integrating advanced technology to offer sustainable energy solutions, both in stand-alone installations and. The invention discloses a portable solar power generation umbrella which mainly comprises a foldable connecting frame (1), a solar fixing shaft (2), a locking nut (3), a storage battery (4), a human strap fixing device (5), a rotation center (6), detachable solar panels (7) and solar panel frame. A solar umbrella is a great outdoor accessory that everyone considers having in their home today, especially in their garden, patio, backyard, poolside, and deck. These amazing items are versatile and come in varying sizes, colors, and patterns from different brands. Our comprehensive vision covers the entire value chain of the energy sector. Our international expansion gives us a global vision and allows us to tackle energy. Umbrella solar panels combine the protection of a traditional umbrella with the power of solar energy.
