

# Victoria solar container lithium battery energy storage solution

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

## Overview

---

Victoria's new project, which utilizes Tesla's Megapacks, is set to store enough renewable energy to power 200,000 homes during peak periods. Victoria is the home of big batteries and has legislated storage targets of at least 2.3 GW by 2035 to provide crucial support for more renewable capacity. In the future, much of our energy will be generated closer to where it is. We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Our design incorporates safety protection. As global electricity demand grows 3% annually (IEA 2023), Victoria's manufacturers are answering the call with cutting-edge storage solutions that act like a "giant battery for the grid".

## Victoria solar container lithium battery energy storage solution

---

### Large-scale battery storage fact sheet

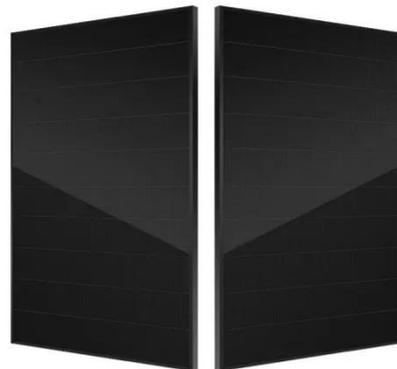

The batteries, strategically located at known stress-points in the electricity network, will provide much-needed backup power and grid-stabilisation functions which are vital to maintaining a reliable and affordable energy ...
