

Vienna Airport uses a 120kW mobile energy storage container

Overview

Office Park 4, which will be commissioned in 2020, uses geothermal energy and has won several awards as Austria's most sustainable office building. Energy from the sun plays an important role in this: with a total of eight photovoltaic systems, Vienna Airport generates around 30 million kilowatt hours of electricity - this corresponds to the electricity consumption of around 7,000 households per year. This means that the airport covers about. imate and energy goals, including 100% clean electricity in and from Austria by 2030. The airport's goal is to achieve net.

Vienna Airport uses a 120kW mobile energy storage container

Flughafen Wien

So betreibt der Airport eine E-Flotte mit aktuell mehr als 380 E-Fahrzeugen. Die Beleuchtungssysteme werden sukzessive auf energiesparende LED-Systeme umgestellt. Der 2020 in Betrieb genommene ...
