

Warsaw energy storage market analysis

Overview

The Poland Smart Grid & Energy Storage Market is valued at USD 1.1 billion, based on a five-year historical analysis. Growth is driven by rising investments in grid modernization, the integration of renewable energy, and rapid advancements in battery and digital grid technologies. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects. The Polish Economic Institute reported that in the power market's main auction, which. The government of Poland looks set to run further capacity market (CM) auctions with the specific aim of enabling gas plants to win, after BESS wiped the floor with the technology at the last auction. 5GW of CM contracts in December's. With 5.4GWh of EU-funded battery storage projects approved last September [1] and 16GW of pre-registered projects in 2023 capacity auctions [6], the country's storage sector's growing faster than spring wheat in Mazovia. The market is. WESS are informal monthly meetings for young professionals and energy experts interested in Poland's energy transformation and utility-scale Battery Energy Storage Systems (BESS).
