

# What are solar like solar panels

## Overview

---

The six main types of solar panels are polycrystalline, monocrystalline, thin-film, transparent, solar tiles, and perovskite. All of these are photovoltaic panels - meaning they use daylight to generate electricity - and they're all categorised based on their material. Learn efficiency, cost, and performance differences to choose the best panels for your home in 2025. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best. Solar panels, or photovoltaic (PV) modules, are devices commonly used on rooftops to collect sunlight and convert it into electricity.

## What are solar like solar panels
