Overview

Belgian Military Satellite Infrastructure comprises several critical components that form the backbone of the country's satellite communication network. These components include the actual satellites themselves, ground stations, antennas, and advanced signal processing. On 17 February 2022, the Belgian Ministry of Defence formally handed over to the NATO Communications and Information Agency (NCI Agency) a facility which will serve as the technical test and research facility for NATO's satellite communications (SATCOM). Located at Camp Casteau in Mons, Belgium. NCSA Sector Mons is collocated with Supreme Headquarters Allied Powers Europe (SHAPE) in Casteau, near the town of Mons in southern Belgium. Aeronautical Telecommunications ICAO Doc 7030.

What are the base stations for Belgian communication engineering

Base Stations

The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme of wireless communications. They are referred to as cell towers or ...
