Overview

To lift solar panels onto your roof, you can use a ladder railing system, a pulley system, a lifting bag, or even DIY lifting systems using a pulley. Carrying them up the ladder can also be done with products like the solar panel caddy, and all of these ideas will make this task. Platform hoists are the safest and fastest way to lift solar panels to rooftops without risking injury or product damage. RGC's new Platform Hoists are engineered for heavy-duty lifting, offering increased capacity and stability for solar installation teams. If you're planning to DIY your solar project, make sure you consider this part of the process.

What are the ways to lift photovoltaic panels

Module Lift: Premier Solar Panel Lifter

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.
