

What is the Tianheng energy storage system used for

Overview

Ningde Times Tianheng energy storage system uses bionic SEI and self-assembly electrolyte technology to clear roadblocks for lithium ions, achieve zero attenuation of power and capacity in 5 years, and control the power consumption of auxiliary machinery throughout its life cycle. Ningde Times Tianheng energy storage system uses bionic SEI and self-assembly electrolyte technology to clear roadblocks for lithium ions, achieve zero attenuation of power and capacity in 5 years, and control the power consumption of auxiliary machinery throughout its life cycle. Chinese battery giant Contemporary Amperex Technology Co Ltd (CATL, SHE: 300750) has launched its new energy storage system Tianheng, or Tener, to further tap the energy storage market. The company rolled out Tener at an event on April 9, saying it is the world's first mass-producible energy. Contemporary Amperex Technology Co. 25 MWh, and multi-dimensional true safety", pressing the accelerator button for the large-scale application and high-quality development of new energy storage. Tianheng is a standard 20-foot containerized energy storage system equipped with CATL's energy storage-specific L-series long-life lithium. April 9th 2024, CATL released the world's first energy storage system with zero attenuation for 5 years and can be mass-produced on a large scale - Tianheng.

What is the Tianheng energy storage system used for

CATL Unveils Tianheng: World's First "Zero Degradation Over Five ...

Tianheng utilizes CATL's L-series long-life, zero-degradation battery cells for extraordinary energy density for lithium iron phosphate (LFP) storage batteries--an impressive ...
