

# What is the best thickness of photovoltaic panel bracket

## Overview

---

The thickness of solar brackets usually falls within the range of 1.5 mm to 5 mm, varying based on design and load requirements. 5 mm to 2 mm brackets may suffice, while commercial projects may utilize thicker brackets for added load-bearing. The Solar Panel Mounting Z Brackets are an excellent choice for anyone looking to securely install solar panels on various surfaces, whether it's your RV, trailer, or shed. Good solar panel brackets. One key piece is the PV panel bracket, which really makes a difference in how well your system performs and how long it lasts. Its high-quality ABS plastic construction allows for both drill-free or drilled installations, making it ideal for RVs, caravans, boats, motorhomes.
