

# What is the price of photovoltaic tracking bracket

## Overview

---

The PV Tracking Bracket market is projected for substantial growth, forecasted to expand from \$15.54 billion in 2025 to an estimated value of \$36. These tracking systems improve energy generation efficiency, enhance overall system performance, and increase the return on. The global global Photovoltaic Tracking Bracket Market size was valued at approximately USD 4.8% during the forecast period (2025 - . Tracking brackets allow solar panels to follow the sun's trajectory throughout the day, optimizing solar irradiance capture. According to studies, single-axis trackers can boost energy production by approximately 20-30% compared to fixed-tilt setups.
