

# What is the tax point stipulated for photovoltaic panels

## Overview

---

Section 25D applies to residential solar installations and allows homeowners to claim 30% of their total system cost as a tax credit. The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your home installed anytime from 2022 through Decem. 2 (Other types of renewable energy are also eligible for similar credits but are beyond. You claim the solar tax credit by filing IRS Form 5695 with your federal tax return, allowing you to deduct 30% of your solar installation costs directly from your tax bill. For most homeowners, that means this credit is no longer accessible due to limited installer capacity heading into year-end.
